

## Pilot: KC PAYG Broadband

**This product is available by invitation only to a limited number of pilot customers and may be withdrawn from supply at any time**

### Introduction and Summary

The KC Pay-As-You-Go (PAYG) broadband pilot will run in Spring 2015 to a limited number of invited participants. It will enable non-KC customers to be connected to standard broadband on a PAYG basis. Pilot participation is not available to existing KCOM customers.

A PAYG Starter Pack, which includes a broadband router and 3GB free data allowance, will be provided to Pilot participants at no charge. When data allowance has been used, customers have the option to buy more top-ups and continue to access the Internet.

### Service Description

Based on ADSL technology, KCOM broadband provides internet access with connection speeds that vary, depending on your line length from the telephone exchange. PAYG broadband has no contract term or monthly charge; you simply buy top-ups to suit your internet usage when it suits you, using a debit or credit card, through a secure online website. Full details are outlined in Section 6, below.
