

## KCOM Broadband Plus

### 1. Service description

KCOM Broadband Plus products are based on an ADSL technology. KCOM Broadband provides internet access with connection speeds that vary, depending on your line length from the telephone exchange. A connection charge applies to customers that require a new analogue line. For connection charges please refer to: [Analogue lines](#)

#### Customer Requirements

- A new or existing KCOM telephone line is required to deliver the ADSL
- Ethernet LAN running TCP/IP (100 BASE T minimum). For LAN connections customer to supply PC Ethernet cards.
- An internet ready device
- All customers should consider the security of their PC. KCOM recommends the use of current anti-virus software and firewall protection. Email anti-virus protection is provided with email POP accounts.

### 2. Engineer visit

We will provide you with an AM or PM appointment. Missed appointment charges apply for any missed installation dates. See charges [here](#).

## 6. Early Termination Charges

Customers on a 12 or 24- month contract that terminate before the end of the contract are subject to the costs of the service for the remainder of the contract term. Where a package is outside of the initial contract period and is being fully ceased, a 30 day notice requirement will apply, after which no additional charges will be raised.

## 7. Other charges

Service		Charge
		Ex. VAT
ADSL Micro-filter	Per Micro-filter	£2.49
Hardware Delivery Fee	Applies to all inclusive hardware	£5.41

## 8. Additional benefits for Gold & Platinum managed services

- Hassle free router configuration and installation by our qualified engineers
- Speedy repair times to keep your business up and running
- Lifetime warranty ensuring a swift router swap-out service
- 5 static IP addresses included in the price
- Free Helpdesk support included

## 9. Conditions

Customers on a 12-month contract that terminate before the end of the contract are subject to the costs of the service for the remainder of the contract term.

## 10. Customer availability & compatible services

KCOM Broadband Plus is only available to business customers on a standard KCOM telephone line. KCOM Broadband Plus prices apply to your high-speed Internet usage only, normal line rental and call charges apply to any telephony services you receive from KCOM over your telephone line.

KCOM Broadband Plus is not suitable for connection on ISDN2/2e, ISDN30/30e or Business Superway lines. Customers with ISDN2/2e or Business Superway will have to have their lines ceased and converted to normal phone lines for KCOM Broadband Max. ISDN30/30e customers will also need an additional analogue line in order to receive the service.

Fax users should note that Group 3, 2 or 1 fax machines may not function correctly due to frequency crossover problems. Therefore an additional analogue (telephone) line should be ordered when you still intend to use a fax machine.

Some Caller Display equipment may interfere with the broadband signal (Caller Display BT CD50 and Caller Display BT CD1500 are known incompatibilities). To check whether your caller display unit or telephone is compatible with broadband, please refer to the manufacturer or supplier.

KCOM recommends that alarm systems are not installed on broadband lines. Most alarm systems will operate as normal, but some which use 'out of band' (greater than 4 kHz) signalling will be incompatible. To check whether your alarm system is compatible, please refer to your alarm system manual or provider.

All services subject to availability, line test and confirmation.

All users of the service are subject to and must abide by our Acceptable Use Policy.
