

## Call Waiting

### 1. Service description

When someone is using the telephone, Call Waiting alerts them with beeps, to inform them that someone else is trying to get through.

The user can then clear down (or hold) their current call and find out who the second caller is. They are able to switch between the two calls, terminating one at any stage.

### 2. Charging structure

Service	Price
Call Waiting	Free

### 3. Note

This service cannot be used in conjunction with ring back
