

Data Connect Access Service

KCOM has agreed to supply the Data Connect Access Service to the CP within the Hull Area. In the event that the CP wishes to connect to a CP Site or End User Site located outside of the Hull Area, KCOM will provide Data Connect Access Services to a CP Site located within the Hull Area and the CP will be responsible for sourcing and connecting any capacity for connection from the CP Site to a site outside of the Hull Area.

The CP may utilise equipment owned by a Third Party CP at the CP Site, subject to a separate agreement with the third party involved. The CP can only use the Data Connect Access Service to connect:

- (a) CP Site to CP Site
- (b) CP Site to End User Site

The Data Connect Access Service cannot be used for connections which are outside the scope of those identified above, including:

- (a) where the usage is for the purpose of building or extending core networks; or
- (b) where the intent is to replicate core network.

Note that except for the connectivity allowed under this Agreement, the Data Connect Access Service must not be used for directly cabled NTE to NTE connection with any other KCOM provided service. KCOM will not be liable for any incidents, reduction in service performance or service failures which result from the Data Connect Access Service being connected in a directly cabled NTE to NTE configuration or if Data Connect Access Service is connected within the CP Site in a NTE-to-NTE configuration.

Excess construction charges

Connection Charges below apply to all installations where routing is determined by KCOM and there are no access impediments. Excess Construction Charges, subject to survey, will only be levied in exceptional circumstances such as the requirement for resilient circuits or, for example, requests for termination requiring substantial interior cabling.

Existing network connectivity

For this criteria to be met an optical fibre cable or cables containing spare optical fibres with which to provide the new Data Connect Access Service or Data Connect Access Services must be available within the CP's and/or End User's own premises / office or place of business this also includes both multiple tenancy units or multiple business units (see exceptions).

The exceptions are as follows:

- (a) If the CP's and/or End User's premises or the CP Site / End User Site contains multiple buildings the optical fibre connectivity for the new Data Connect Access Service must be within the building or location where the Data Connect Access Service is required and not contained externally in another building.
- (b) If an existing optical fibre cable is present within the building or location but contains no spare optical fibres available for connecting the new Data Connect Access Service or Data Connect Access Services.
- (c) KCOM maintain the right to designate optical fibres within a cable as spare for fault purposes and as such are not available for new CP and/or End User Data Connect Access Services /connections.

- (d) Where the new Data Connect Access Service is required within a building containing multiple business / tenancy units, the optical fibres required to provide the new service must not exceed a cabling distance of more than 25 metres from where the existing cable is terminated.

No existing network connectivity

This relates to installations where no optical fibre cable exists or where a cable does exist but has no spare optical fibre capacity available to provide the new Data Connect Access Service. KCOM maintain the right to designate optical fibres within a cable as spare for fault purposes only and as such would not be available to provide a new Data Connect Access Service for CPs and/or End Users.

Connection Charges - No Existing Network Connectivity				
Feature	Notes	Operative Date	Until	Connection Charge Ex VAT
DCAS 2Mb		01/04/2014		£3,150.00
