

Not available for new supply KC Lightstream Standalone

1. Introduction and Summary

The KC Lightstream service offers superfast broadband. It can be bought as either a standalone product, alongside a phone service, or as part of a bundle. This document shows details of standalone Lightstream services.

2. Service Description

Based on fibre optic technology, KC Lightstream provides superfast internet access with FTTH technology, where possible. There are two types of fibre technology that KC use:

- **Fibre to the Home (FTTH):** This carries the fibre all the way into your home; and
- **Fibre to the Cabinet (FTTC):** Sometimes called 'VDSL' this is where fibre is connected to the nearest distribution 'cabinet' and from there to your house, using a copper line. As such the speed cannot be guaranteed end-to-end, and is quoted in a similar way to standard broadband as an 'up to' speed. This technology is able to support up to 75 Mbps.

Wherever possible, KC use Fibre to the Home (FTTH) technology to enable Customers to enjoy the best speeds.

3. Pricing

Prices detailed below are inclusive of VAT. Discounts are available for payment by Direct Debit and Online Billing, both of which provide convenience and control to our customers.

4. Contract Term

The standard contract length is 18 months for KC Lightstream. Flexible contract options are available for an additional charge, and Early Termination Fees apply. Please see *Service Options* and *Additional Charges* section of this document.

5. Connection Charges

Lightstream 170		Lightstream 300		Lightstream 800		Lightstream Home Unlimited
