

## Business 'Lite' Packages (Trial Tariff)

### 1. Service description

KCOM Business packages enable customers to combine their fixed voice and broadband products on to one consolidated monthly bill. The 'Lite' packages are ideal for new businesses with limited capex and for those who require basic connectivity for activities such as emailing and light web browsing. If you anticipate using the service frequently then we would recommend that you consider choosing one of our other business packages to avoid any unnecessary over usage charges. Click on this [link](#) to see our other packages.

### 2. Summary product table

Included Services	Email anti-spam and anti-virus protection (including end-user controls)

### 4. Additional charging information

#### Upgrade & downgrade fees

There are no upgrade charges. As any downgrade will be effectively a cancellation of a service, the early termination charge will constitute the “downgrade” fee.

A downgrade is defined when a customer changes from the Business ‘Lite’ Package to an analogue line only. See section on termination charges for detail related to that situation.

### 5. Fixed broadband additional usage charges

£5.00 Ex VAT (£6.00 Inc. VAT) for every GB or part thereof.

### 6. Service termination & charging

#### KC Business ‘Lite’ Package

Where a customer serves notice within the initial contract period to cease their package and does not retain any element of that package, appropriate early termination charges based on the remaining duration of their contract will apply. These will be calculated as the line rental charges related to the remaining duration of the contract – for instance, 6 months remaining = 6 x £29 = £174.

Where a customer cancels their package contract but retains a fixed line, early termination charges should be calculated as £12.50 x N, where N = the number of months remaining in the package contract.

All other associated services will also be cancelled in line with the date of the request unless a separate and new agreement is signed by the customer for the services they wish to retain. There will be no additional termination charges raised for these. Where a customer up or downgrades their broadband service to a different package, no early termination charges for that element will apply.

Where the customer ceases their package but retains any of the services which are part of their original package, they will commence a new 12 month contract for that service.

Where a package is outside of the initial contract period and is being fully ceased, a thirty day notice requirement will apply, after which no additional charges will be raised.

Where a customer has moved from an existing contract with a longer duration (i.e. from a product/service with a two year minimum period) the package contract period will apply for termination charge calculation purposes.

## 7. Other charges
