

Lightstream Starter bundle – Not Available for New Supply

Introduction & summary

Lightstream Starter is a bundle to help new to KCOM customers get connected to Superfast or Ultrafast broadband where Lightstream is available, in one convenient bundle on a single bill.

Service description

Based on fibre optic technology, Lightstream provides superfast internet access with a more reliable connection and faster speeds than standard broadband. There are two types of fibre services that we use:

- **Fibre to the Home (FTTH):** This carries the fibre all the way into your home and speeds are not affected by distance from the network; and
- **Fibre to the Cabinet (FTTC):** Sometimes called 'VDSL' this is where fibre is connected to the nearest distribution 'cabinet' and from there to your home, using a copper line. As such the speed is affected by distance from the network, and is quoted in a similar way to standard broadband as an 'up to' speed. This technology is able to support up to 75 Mbps.

Wherever possible we use Fibre to the Home (FTTH) technology, to enable customers to enjoy the best possible superfast connection speeds.

Pricing

Prices below are inclusive of VAT. Discounts are available for payment by direct debit and online billing, both of which provide convenience and control to our customers.

Contract term

The standard contract length is 18 months for this bundle. Flexible contract options are available for an additional charge, and early termination fees apply. Please see service options and additional charges sections of this document.
