

KCOM SMB: Lightstream Landlord

Introduction & Summary

The Lightstream Landlord service brings together Centrex telephony and Lightstream (Superfast fibre broadband), allowing landlords (including student accommodation agencies) to resell inclusive telephone and Lightstream services to the tenants in residential Landlord properties, in one convenient bundle, on a single bill.

KCOM Landlord Lightstream is intended for use by residential landlords who want to provide a superfast broadband service to the tenants who occupy their rented property. KCOM Landlord Lightstream is only available for use by landlords who rent out residential property; not commercial property.

You are entitled to make KCOM Landlord Lightstream services available for use by the tenants who occupy residential property that you rent out. However, you are not entitled to resell the KCOM Landlord Lightstream services on a more general basis. You must not make any wider commercial use of KCOM Landlord Lightstream services, and you must not allow your tenants to make commercial use of the KCOM Landlord Lightstream services.

Service description

Based on Fibre optic technology, Lightstream provides superfast internet access with a more reliable connection and faster speeds than standard broadband. There are two types of Fibre services that we use:

- Fibre to the Premise/Home (FTTP/H): This carries the Fibre all the way into the premise and speeds are not affected by distance from the network; and
- Fibre to the Cabinet (FTTC): Sometimes called 'VDSL' this is where Fibre is connected to the nearest distribution 'cabinet' and from there to your property, using a copper line. As such the speed is affected by distance from the network, and is quoted in a similar way to standard broadband as an 'up to' speed. This technology is able to support up to 75 Mbps.

Wherever possible we use Fibre to the Premise/Home (FTTP/H) technology, to enable customers to enjoy the best possible superfast connection speeds.

KCOM Landlord Plus comes with a Centrex telephone line. Outgoing calls are barred, apart from emergency calls (to 151 or 999).

Pricing

Prices detailed below are exclusive of VAT. They are based on payment by Direct Debit and with Online Billing, offering convenience and control. You can choose from a choice of payment dates to suit you, and using KCOM Online you can view your account details whenever you want.

Contract term

The standard contract length is 24 months for Landlord Lightstream. Customers who cancel within the first year will be charged for all outstanding rentals to the end of the minimum contract period.

Connection & installation charges

Standard Centrex installation charges apply for any new Centrex lines required for brand new properties. These charges can be found [here](#). Each Landlord Lightstream product incorporates the rental of a single Centrex line.

Lightstream Landlord	Service Detail	Ex VAT
Connection 50 metres (upfront)	Router/ONT are connected within 48M of Fibre entry point	£120.00

Network support availability & service standards

Target Time to Repair Faults (“TTRF”)

The TTRF for all Lightstream Landlord Services is 3 Working Days. If a fault with the service occurs, you or the end user should try to resolve the faults by rebooting any affected routers or PCs before raising a fault with the KCOM Network Support team. We reserve the right to raise additional charges if faults are reported to the KCOM Network Support team which, upon investigation, are shown to be faults you or the end users could have resolved by re-booting the affected routers or PCs

You shall be responsible for ensuring that there is a recognized process by which end users can contact you about faults or services issues. The KCOM Network Support team will only liaise with you (our customer) in relation to faults or service issues; and not the end users (your tenants) unless we have specifically agreed to liaise directly with your end users. You will then have sole responsibility for any onward communication with your end users.
