

## Ethernet Direct Access Service

Ethernet Direct Access Service comprises Ethernet point to point data circuits. The CP can only use Ethernet Direct Access Service to connect:

- > CP Site to End User Site
- > CP Site to CP Site
- > End User Site to End User Site within the Hull Area.

The Ethernet Direct Access Service cannot be used for connections which are outside the scope of those identified above, including:

- > where the usage is for the purpose of building or extending core network;
- > where the intent is to replicate core network; or
- > where there is onward connection to a point outside of the Hull Area.

Please refer to the Ethernet Connect Access Service where onward connection is required. Note that, except for the connectivity allowed under this Agreement, the Ethernet Direct Access Service must not be used for directly cabled NTE to NTE connection with any other KCOM provided service. KCOM will not be liable for any incidents, reduction in service performance or service failures which result from the Ethernet Direct Access Service being connected in a directly cabled NTE to NTE configuration or if Ethernet Direct Access Service is connected within the CP Site in a NTE-to-NTE configuration.

### Excess construction charges

Connection Charges below apply to all installations where routing is determined by KCOM and there are no access impediments. Excess Construction Charges, subject to survey, will only be levied in exceptional circumstances such as the requirement for resilient circuits or, for example, requests for termination requiring substantial interior cabling.

### Connection charges

Connection charges are all per circuit.

Connection Charges						
Feature	Notes	Operative Date	Until	Existing Connectivity Ex VAT	No Existing Connectivity Ex VAT	Connection Charge Ex VAT
EDAS 10Mb		01/09/2019	15/02/2023	£550.00	£1,700.00

Notes:

- a From 16/02/23 connection charges are no longer per end

For each day or part day KCOM is late in meeting the Proposed Start Date, the CP has the right to compensation of 0.5% of the Connection Charge (the daily sum) subject to a maximum claim of 30% of the Connection Charge (60 x the daily sum).

Notes:

- b. A single circuit may be ordered for 50% of the price shown, where a site requires connection back into the local exchange only (1 End in Same Exchange)
- c. If you require alternative speeds across a 10Gb bearer, KCOM can limit the line speed of the circuit at the time of provisioning.
