

Ethernet Connect Access Service

KCOM has agreed to supply the Ethernet Connect Access Service to the CP within the Hull Area. In the event that the CP wishes to connect to a CP Site or End User Site located outside of the Hull Area, KCOM will provide the Ethernet Connect Access Service to a CP Site located within the Hull Area and the CP will be responsible for sourcing and connecting any capacity for connection from the CP Site to a site outside of the Hull Area. The CP may utilise equipment owned by a Third Party CP at the CP Site, subject to a separate agreement with the third party involved.

The CP can only use the Ethernet Connect Access Service to connect:

- > CP Site to CP Site
 - > CP Site to End User Site
- within the Hull area

The Ethernet Connect Access Service cannot be used for connections which are outside the scope of those identified above, including:

- > where the usage is for the purpose of building or extending core networks; or
- > where the intent is to replicate core network

Note that, except for the connectivity allowed under this Agreement, the Ethernet Connect Access Service must not be used for directly cabled NTE to NTE connection with any other KCOM provided service. KCOM will not be liable for any incidents, reduction in service performance or service failures which result from the Ethernet Connect Access Service being connected in a directly cabled NTE to NTE configuration or if Ethernet Connect Access Service is connected within the CP Site in a NTE-to-NTE configuration.

Excess construction charges

Connection Charges below apply to all installations where routing is determined by KCOM and there are no access impediments. Excess Construction Charges, subject to survey, will only be levied in exceptional circumstances such as the requirement for resilient circuits or, for example, requests for termination requiring substantial interior cabling.

Connection charges

Connection charges are all per circuit.

Notes:

a From 16/02/23 connection charges are no longer per end

For each day or part day KCOM is late in meeting the Proposed Start Date, the CP has the right to compensation of 0.5% of the Connection Charge (the daily sum) subject to a maximum claim of 30% of the Connection Charge (60 x the daily sum).
