1 end only within original KC licensed area, interconnection with another operator	£5,357.00	£4,286.00

Notes - for Wholesale Megaline 2 Circuits

- Prices will be available on application for all network locations outside the original KC licensed area.

Lead Times

- The standard lead-time for delivery of the Service is 42 Working Days, subject to survey and a suitable agreed roll-out plan. The installation date will be the Proposed Start Date (PSD) unless a later date has been specified in writing before commencement of installation.

Cancellation charges

- This part outlines the termination costs associated with cancelling orders for private circuits before they have been delivered.
- The delivery of a circuit is timed to meet a Proposed Start Date (PSD). The termination charges raised reflect the amount of work undertaken and are calculated on the number of working days

between the date the customer requests cancellation and the PSD. The cancellation charge is expressed as a percentage of the appropriate circuit connection charge.

- The full cost of any additional work, e.g. duct, that is separately identified on the contract and which has been specifically incurred for the order by the time of the cancellation, will be recovered in addition to the cancellation charge.
- The cancellation charge scale applies to circuits normally provided within 42 working days.
- All days will be calculated as working days, i.e. ignoring weekends and public holidays.
- The cancellation date must be given in writing by the customer.
- Should a customer request amendments to the PSD and subsequently cancel the order, the cancellation charge will be calculated on the days between the date that the customer notified KC of the first amendment and the original PSD.

Termination payments

- This part outlines the termination costs associated with cancelling circuits currently in service.
- The Termination Payment shall be the rental Charges payable for the remaining months of the minimum period.

Restrictions

- Services are provided on an unprotected and non-resilient basis. Ring protection can be provided at additional cost. Network protection and fully resilient diverse routing is available at additional cost, subject to survey.

Definitions

- Resilience means the prices assume no diverse routing of fibres from the customer premises to the KC network.
- Proposed Start Date means the date on which KC is to complete provision of the access circuit or such as maybe agreed in writing between KC and the Customer.
- Existing Network Connectivity means the customer has an equivalent first wholesale private circuit with KC. Two circuits ordered at the same time would result in the second circuit connection fee at the Existing Network Connectivity connection fee.
