

KC Lightstream Standalone Not Available for New Supply, Effective 23 April 2018

1. Introduction & summary

The KCOM Lightstream service offers superfast broadband. It can be bought as either a standalone product, alongside a phone service, or as part of a bundle. This document shows details of standalone Lightstream services.

2. Service description

Based on fibre optic technology, Lightstream provides superfast internet access with a more reliable connection and faster speeds than standard broadband. There are two types of fibre services that we use:

- **Fibre to the Home (FTTH):** This carries the fibre all the way into your home and speeds are not affected by distance from the network; and
- **Fibre to the Cabinet (FTTC):** Sometimes called 'VDSL' this is where fibre is connected to the nearest distribution 'cabinet' and from there to your home, using a copper line. As such the speed is affected by distance from the network, and is quoted in a similar way to standard broadband as an 'up to' speed. This technology is able to support up to 75 Mbps.

Wherever possible we use Fibre to the Home (FTTH) technology, to enable customers to enjoy the best possible superfast connection speeds.

3. Pricing

Prices detailed below are inclusive of VAT. Discounts are available for payment by Direct Debit and Online Billing, both of which provide convenience and control to our customers.

4. Contract term

The standard contract length is 18 months for KC Lightstream. Flexible contract options are available for an additional charge, and Early Termination Fees apply. Please see Service Options and Additional Charges section of this document.

5. Connection charges

Lightstream Home	Lightstream Home Plus	Lightstream Home Xtra	Lightstream Home XL	Lightstream 350
