

## Not Available for New Supply, Effective 23 April 2018 Broadband Packages

- Basics BB
- Basics Fibre BB
- Lightstream 150 BB
- Lightstream 350 BB

### Introduction & summary

These broadband products incorporate *KCOM Network Access* with fast, reliable connectivity. As standard there are no calls included with these products but a customer is able to either make calls on a pence-per-minute basis, or have the flexibility to choose a *Call Bolt-on*, to create a complete package to suit their needs.

### Service description

#### Standard broadband

Based on ADSL technology, KCOM provides internet access with connection speeds that vary, depending on the line length from the telephone exchange.

#### Fibre broadband

Where fibre optic technology is available, KCOM is able to offer improved internet access with a more reliable connection and faster speeds than standard broadband.

There are two types of fibre services that KCOM use:

- **Fibre to the Home (FTTH):** This carries the fibre all the way to the customer's home and speeds are not affected by distance from the network.
- **Fibre to the Cabinet (FTTC):** Sometimes called 'VDSL' this is where fibre is connected to the nearest distribution 'cabinet' and from there to the customer's home, using a copper line. As such the speed is affected by distance from the network, and is quoted in a similar way to standard broadband as an 'up to' speed. This technology is able to support up to 75 Mbps download speed.

Wherever possible KCOM use Fibre to the Home (FTTH) technology, to enable customers to enjoy the best possible broadband speeds and improved reliability.

### Pricing

Prices below are inclusive of VAT. Discounts are available for payment by direct debit and online billing, both of which provide convenience and control to customers.

### Contract term

The standard contract length is 18 months for these packages. Early termination fees apply; please see the *additional charges* section of this document.

## Connection charges
