

## Broadband Service Interconnect Link (BSIL) Price List

### Service description

The Broadband Service Interconnect Link (BSIL) Backhaul Service provides a broadband services interconnect link which provides connectivity between the Wholesale FibreLine Extension Path and the CP Site. The product delivers an Ethernet 1Gbps or 10Gbps connection and Ethernet interface from the requested WFL Site to the CP Site for the CP Network.

The product is configured to aggregate the CP requested End User Site connections as they are processed from the Layer 2 Tunnelling Protocol (L2TP) Access Concentrator (LAC), attach the End User data to the correct L2TP tunnel and transport between KCOM and the CP in the industry standard formats. The connection also contains the functionality to handle the Remote Authentication Dial-In User Service (RADIUS) communications between the KCOM LAC, KCOM Broadband Network Gateway (BNG), and the CP Radius and L2TP Network Server (LNS). For a description of the Services please refer to the Broadband Service Interconnect Layer (BSIL) Technical Characteristics document (CIP041).

### Connection Charge

Service	Operative Date	Until	Connection Charge
			Ex VAT
BSIL 1Gbps	01/05/19		£4,876.60
BSIL 10Gbps	01/05/19		£12,060.00

### Rental Charge

Service	Term	Operative Date	Until	Rental Charge Per Annum
				Ex VAT
BSIL 1Gbps	1	01/05/19		£8,432.00
BSIL 1Gbps	3	01/05/19		£8,110.00
BSIL 1Gbps	5	01/05/19		£7,789.00
BSIL 10Gbps	1	01/05/19		£19,395.00
BSIL 10Gbps	3	01/05/19		£18,525.00
BSIL 10Gbps	5	01/05/19		£17,656.00
